Funding for the Consortium was provided by the Maryland General Assembly as part of the Blueprint for Maryland's Future

Coordinated *Community* Supports Partnership

Strengthening behavioral health support for every student in Garrett County and Allegany County

What is the Community Supports Partnership?

A collaborative local network designed to ensure every student and family has access to high-quality behavioral health and "wraparound" support services. We operate using the Collective Impact model, meaning we bring together schools, behavioral health providers, and community agencies to work toward one goal:

the well-being of our youth.

Our Three Primary Roles

We act as the central link between service providers and the local school systems. We ensure that services are not duplicated and that they align with the specific needs of our schools.

We manage the grant funding from the Maryland Community Health Resources Commission (CHRC) and distribute it to local service providers (our "Spokes") who deliver care directly to students.

We collect and analyze data to make sure our programs actually work. We ensure providers use Evidence-Based Programs (EBPs)—interventions proven by science to help children with anxiety, depression, and trauma.

The Services We Support

We coordinate a Multi-Tiered System of Supports (MTSS) to meet students wherever they are in their mental health journey:

-  Tier 1 (Universal): School-wide programs like stress-management workshops and bullying prevention for all students.
-  Tier 2 (Early Intervention): Targeted support for students with emerging concerns, such as small-group counseling or mentoring.
-  Tier 3 (Intensive Treatment): One-on-one therapy, crisis intervention, and specialized family support for those with the highest needs
